

THE EMBODIMENTS OF THE INVENTION IN WHICH AN EXCLUSIVE
PROPERTY OR PRIVILEGE IS CLAIMED ARE DEFINED AS FOLLOWS:

1. A hockey skate comprising a boot, a blade holder,
5 a blade received in said blade holder and an adjustable
arrangement for altering the attachment orientation of
said blade holder to said boot; said blade holder
including an outwardly extending toe flange and an
outwardly extending heel flange; said adjustable
10 arrangement securing said outwardly extending toe flange
and said outwardly extending heel flange of said blade
holder to said boot; said adjustable arrangement engaging
said outwardly extending flanges of said blade holder in
one of a plurality of positions where each position has a
15 different position of the blade relative to a centerline
of the boot.

2. A hockey skate as claimed in claim 1 wherein said
adjustable arrangement includes a series of releasable
20 fasteners passing through ports in said blade holder and
engaging said boot to secure said holder to said boot.

3. A hockey skate as claimed in claim 2 wherein said
holder has a plurality of elongate slots in said toe
25 flange to accommodate a series of toe in and toe out
positions.

4. A hockey skate as claimed in claim 3 wherein said
blade holder has a plurality of elongate slots in said
30 heel flange to accommodate a series of heel in heel out
positions.

5. A hockey skate as claimed in claim 4 wherein each
of said flanges has at least 4 slots.

6. A hockey skate as claimed in claim 1 wherein said adjustable arrangement includes a clamping arrangement for each flange to engage said holder in any of said positions.

5

7. A hockey skate as claimed in claim 6 wherein each clamping arrangement includes a first component secured to said holder with said first component received in a second component secured to said boot.

10

8. A hockey skate as claimed in claim 7 wherein said first component is a plate received in a slot of said second component along an edge portion of said first component and to the exterior of said blade holder to be accessible on a sole of said boot.

15

9. A hockey skate as claimed in claim 1 wherein said blade holder is of an injectable moldable material.

20

10. A hockey skate as claimed in claim 1 wherein said blade holder is of a reinforced composite plastic material.

25

11. A hockey skate comprising a boot, a blade holder, a blade received in said blade holder and an adjustable arrangement for adjustably securing said blade holder to said boot in one of a series of positions where each position alters the relationship of the blade relative to the centerline of the boot.

30

12. A hockey skate as claimed in claim 11 wherein said adjustable arrangement can be adjusted with said skate being worn by a user.

- 14 -

13. A hockey skate as claimed in claim 11 wherein said adjustable arrangement includes a front and rear worm drive associated with pedestals of said blade holder.

- 5 14. A hockey skate as claimed in claim 13 wherein said worm drives are accessible to the exterior of the pedestals.
